ABOUT
 A JSON file is retrieved from the link that was given and then the objects data in the file are retrieved and passed into another map called to do list.The data is then retrieved and displayed onto the user's interface.The data contains a title, due date, status etc.The user interface was made to be interactive.

DETAILS PAGE
This is the page where the status/profile of a task is displayed.The user can find out is a task has been completed or not on this page, the time of completion and the title of the task completed.

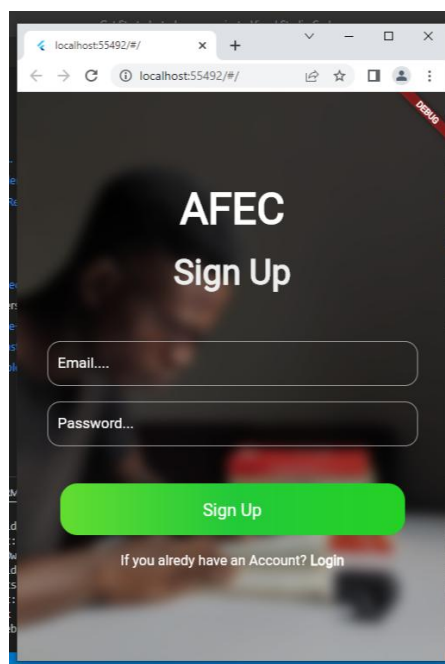

DASHBOARD
The dashboard page displays all the tasks that have both been completed and not completed.

SIGN-UP PAGE

This page is where new users get registered and create new account.The user sign's up with a valid email address and a strong password.The password can be made up of numbers, alphabetic characters and special characters.The user then users the email and password created to later access and login to the account that has been created.

SIDE BAR

The side bar contains the profile of the user and the details of the opened task and an exit out of a task.

THANK YOU!
